Quality Associates Helps the National Black Leadership Roundtable “Take Five to the Polls” Voter Drive

Columbia, Md. -- October 10, 2006 -- Quality Associates, Inc., an established provider of services and solutions for quality assurance, document management, imaging and archiving, announced that it is helping the National Black Leadership Roundtable to register new voters as part of the organization’s nationwide “Take Five to the Polls” voter registration drive.

The goal of the “Take Five to the Polls” program is to sign up one million volunteers who will educate, register and take to the polls five million new African American voters on Election Day 2006. The National Black Leadership Roundtable is encouraging volunteers to enroll in the program by signing up online at www.nblr.us/volunteerform.html.

For this project, Quality Associates is using high-speed, high-resolution scanners and software to capture the data from forms submitted via postal mail, fax, and via the Internet. The information is then supplied to the National Black Leadership Roundtable, which then contacts the volunteers and assigns each one to five unregistered voters to work with, encourage, and take to the polls.

Greg Chalmers, Business Development Executive, Information Systems Division, Quality Associates, said, "Quality Associates is proud to be performing work on behalf of the National Black Leadership Roundtable for this important voter registration initiative. We are pleased to be demonstrating to the organization how the use of advanced capture technologies can serve to effectively streamline the way their volunteer forms are handled, no matter how these forms are submitted."

Now celebrating its 20th year in business, Quality Associates performs a wide range of content and document management and conversion services to local, state and federal government agencies, and to corporations in industries such as law, finance, and accounting.

About Quality Associates, Inc.

Quality Associates, Inc. (QAI) provides comprehensive, customized software, services and solutions that support all aspects of knowledge and content management. QAI's full range of integrated offerings include software applications, hardware, and systems for scanning and imaging; services for document and materials conversion, storage, and electronic archiving; systems integration and support; and strategic consulting for quality assurance.
