Quality Associates Performs Document Management Services for D.C.-based Nonprofit Safe Kids Worldwide

Columbia, Md. – December 5, 2006 -- Quality Associates, Inc., an established provider of services and solutions for quality assurance, document management, imaging and archiving, announced that it is performing ongoing document management and imaging work on behalf of the Washington, D.C.-based nonprofit organization Safe Kids Worldwide.

Quality Associates is performing work in support of the child passenger safety program “Safe Kids Buckle Up”, which funds car seat inspection stations and mobile inspection units that operate throughout the United States. As part of the program, parents have their installed car seats inspected by a certified technician, who completes a “Child Passenger Safety Checklist” form about the car seat and its installation.

As part of the ongoing work, Quality Associates expects to handle tens of thousands of forms each year on behalf of Safe Kids Worldwide. For this project, Quality Associates is using high-speed, high-resolution Bell and Howell Spectrum 8140XF scanners and Kofax’s Ascent Capture software to capture the data from the forms that are collected during the inspections.

The information is then returned to Safe Kids Worldwide in a more useable and searchable Access database with additional custom reporting options. In addition, Quality Associates redesigned the forms to make it easier for the inspectors to complete the forms and ensure that data could be accurately captured.

Scott Swidersky, director, Information Systems Division, Quality Associates, said, “Quality Associates is pleased to be working with Safe Kids Worldwide to meet their documentation requirements. By providing a high level of service, it is our goal to expedite the information

capture process and enable Safe Kids Worldwide to focus on fulfilling its mission of preventing accidental injuries to children across the U.S.”

Now celebrating its 20th year in business, Quality Associates performs a wide range of content and document management and conversion services to local, state and federal government agencies, and to corporations in industries such as law, finance, and accounting.

About Quality Associates, Inc.

Quality Associates, Inc. (QAI) provides comprehensive, customized software, services and solutions that support all aspects of knowledge and content management. QAI’s full range of integrated offerings include software applications, hardware, and systems for scanning and imaging; services for document and materials conversion, storage, and electronic archiving; systems integration and support; and strategic consulting for quality assurance.
