Visioneer Names Quality Associates, Inc. as First Federal e4e Reseller

Quality Associates is First Qualified Reseller to Offer New eCapture for eRoom Document Scanning Solution to Federal Agencies

Columbia, Md. and Pleasanton, Calif. – January 10, 2006 – Quality Associates, Inc. an established provider of services and solutions for document management, imaging and archiving, has announced that it has been named by Visioneer as the first federal reseller of eCapture for eRoom (e4e). The e4e product is a one-touch document scanning solution for organizations and enterprises using EMC Documentum's eRoom®, a secure, Web-based workspace with virtual "rooms" for electronic collaboration.

By turning to Quality Associates, federal agencies will be better able to transition from their reliance on paper documentation to paperless, electronic documentation. Industry analysts are forecasting that spending on knowledge management solutions by the federal government will continue to increase, surpassing \$1 billion by 2008.

This designation allows Quality Associates to provide federal agencies with advanced, time-saving e4e scanning and archiving hardware and software solutions. Jointly developed by Visioneer Inc., a leader in intelligent imaging solutions, and Daybreak Intellectual Capital Solutions, Inc., a Documentum Select Services team member and premier provider of custom Documentum solutions, the eCapture for eRoom solution is comprised of a GSA-compliant Strobe XP 470 scanner and software that allows users to easily and quickly scan paper documents and then save them into an EMC Documentum eRoom in a variety of useful, searchable formats, including PDF, JPEG, and BMP.

Don McMahan, executive vice president of sales and marketing for Visioneer, said "We are extremely pleased to name Quality Associates as Visioneer's first federal reseller of eCapture for

eRoom. Quality Associates has served clients for 20 years, and their established track record in completing major document conversion and archiving projects with major government agencies made them a logical choice to be our first reseller of the new e4e solution.”

Scott Swidersky, director, Information Systems Division, Quality Associates, said “Quality Associates is thrilled to be designated as the first qualified reseller of eCapture for eRoom. Visioneer is a company that has become the clear leader in document imaging solutions. eCapture for eRoom represents a major achievement for both Visioneer and Daybreak, and the solution will greatly benefit federal agencies that are in need of solutions that facilitate the exchange of electronic information across organizations.”

eCapture for eRoom has received the “Designed for Documentum” logo designation, a mark of quality and value that customers insist on in enterprise applications. The Designed for Documentum accreditation demonstrates that eCapture for eRoom has successfully met a comprehensive set of criteria for good design, development and implementation.

After becoming an e4e reseller, Quality Associates completed a comprehensive eCapture Solution Provider (ESP) training program with Daybreak ICS. Quality Associates is now authorized to provide full solution services for e4e to both public and private organizations and enterprises.

About Quality Associates, Inc.
