DocPoint Solutions Named to TopSharepoint.com's List of SharePoint Consulting Companies

Inclusion Recognizes Both SharePoint Branding Experience and Successful Project Implementations

Fulton, Md. -- June 29, 2011 -- DocPoint Solutions, Inc. (www.docpointsolutions.com), a subsidiary of Quality Associates, Inc. that specializes in implementing, training and supporting Microsoft SharePoint and its integrated suite of products, today announced its inclusion on TopSharePoint.com's most recent list of SharePoint Consulting Companies. According to the website, the list serves as a resource for organizations seeking a consulting company with SharePoint branding experience and a history of successful project implementations using the SharePoint platform. The complete list contains 53 U.S. and international firms known for their SharePoint expertise.

Many organizations are moving to the Microsoft SharePoint platform due to its familiarity, ease of use and affordability. However, making the transition often requires firms to train existing IT staff, hire new IT personnel or contract with a consulting company, such as DocPoint Solutions. TopSharePoint.com's article indicates that "… the third choice [a consulting company] will be the safest; and in some cases the cheapest."

DocPoint Solutions also provides a full range of consultative services related to document and records management with ECM. Its myriad partner relationships, including those with KnowledgeLake, Vizit, AvePoint, Nintex, Fujitsu, NSI and Metalogix-StoragePoint, uniquely position DocPoint Solutions as a leader in delivering the diverse capabilities clients require in their SharePoint solutions. DocPoint specializes in servicing government agencies, nonprofits and corporations and holds a GSA Schedule 70 contract (GS-35F-0654W).

In being named to this prestigious list, DocPoint Solutions Vice President Bob Dickerson said, "Our specialty is leveraging our experience, expertise and resources to provide thoughtful, innovative solutions to meet organizations' wide-ranging needs when implementing Microsoft SharePoint.
