MEMORANDUM TO FEDERAL AGENCY CONTACTS: Quantum Information Science and Technology White Paper

I am pleased to announce the issuance of a new NARA white paper – [Quantum Information Science and Technology: Implications for Records Management](#).

This white paper is intended to provide a non-technical introduction to Quantum Information Science and Technology (QIST) for federal records managers. Emerging quantum technologies could have big impacts in these areas of records management: cryptography, authentication, encrypted communication, storage of records, and records retrieval. Records managers may find this information helpful as QIST technology evolves and matures.

If you have any questions or comments about the white paper and this research, please email us at mpolicy@nara.gov.

LAURENCE BREWER
