for Planned Work and
Unplanned Work

Implementation of these business needs were built out in their existing M365 tenant.

The scope of services initiated with a business analysis session and migrated into a review of requirements with the architecture and development teams. The project management methodology utilized Agile to deliver progressive iterations of development.

The Agency has a vision to provide economic opportunity through innovation, helping rural America to thrive; to promote agriculture production that better nourishes Americans while also helping feed others throughout the world; and to preserve our Nation's natural resources through conservation, restored forests, improved watersheds, and healthy private working lands.

ABOUT QAI

Quality Associates Incorporated (QAI), a Konica Minolta company, specializes in consultation, architecture, planning and design for Microsoft® M365® and its integrated suite of products. As a member of the Microsoft Cloud Partner Program, QAI offers innovative enterprise and cloud content management solutions that place organizations' business processes, challenges, and objectives as the primary system design criteria.

QAI is focused on providing technology services to a wide array of government and commercial clients. Our expertise and track record will be important for this project. Our comprehensive solutions and vast experience made us the ideal long-term strategic partner for this agency and exceeded their expectations on this project.
