Virtuoso Desktop

VIRTUOSO DESKTOP
SIMPLIFYING FEDERAL RECORDS COMPLIANCE

Compliance Certification Made Easy!
Ensure compliance with permanent Federal records digitization standards

Virtuoso Desktop is a powerful, self-service Windows application designed to help organizations verify that their digitized permanent records meet federal compliance standards. Tailored for non-technical users, Virtuoso Desktop performs detailed audits aligned with the National Archives and Records Administration's (NARA) regulations (36 CFR Part 1236, Subpart E). With clear reporting, remediation guidance, and forensic transparency, it enables small to medium-sized enterprises to maintain trust and accountability in their digital preservation efforts—without the need for complex tools or continuous IT support.

KEY BENEFITS:

- **Accelerate throughput:** Faster job assignment and reduced project timelines.

- **Cut storage costs:** Advanced encoding significantly reduces file sizes.

- **Automate compliance:** Integrated tools verify and enforce federal digitization standards.

- **Proven and repeatable:** Forensic audit reports provide detailed, independently verifiable compliance results.

Ensure Confidence in Your Digitized Records

Virtuoso Desktop provides an inspection of a batch of digitized records for compliance with the mandatory regulations found in the **National Archives and Records Administration's Electronic Code of Federal Regulations (36 CFR Part 1236, Subpart E).** For each part of these rules, an audit report provides detailed results regarding compliance or non-compliance, including:

- Master file requirements
- Reference targets
- Metadata
- Checksums

The report also generates supporting forensic information. The forensic information demonstrates how the assertions in the report were determined and facilitates independent reproduction of the results for compliance or non-compliance.

Virtuoso Desktop is installed by users on a single computer and is a software-only solution that does not include any hardware.

Virtuoso Desktop is offered in a bundle with GoldenThread NXT. GoldenThread Device/DICE Level Targets offered separately.

System Requirements
Only supporting PCs
(No Macintosh edition available)

OS: Windows 10, Windows 11

RAM: at least 8 GB for PNG, TIFF, JPEG2000 files. Large multi-page PDF/A files may require additional RAM.

Storage: 1-2 GB free space to install, additional storage may be required to store report and forensic file output.

Display Resolution: 1200x800

Internet Access: Required
